Summary table

	Jeremy Corbyn was right to warn that Scottish independence would be 'economically catastrophic'	Scotland will probably become an independent country in the next 20 years	Theresa May should refuse to give the Scottish Government permission for a second referendum until the UK has completed its departure from the EU	Nicola Sturgeon is right to call for a second independence referendum to address what she calls a 'democratic deficit' given that most Scots voted to Remain in the EU	Scotland would be better off as an independent country within the EU than it would be as part of a UK outside the EU	People in Scotland who support independence ought to appreciate more the subsidies paid to Scotland by taxpayers in the rest of the UK
